

All the equipment you need shipped right with your pool.

In addition to the above, with the Trident Program you have access to any and every option available for today's high tech pools, and all at wholesale pricing...

CONVENIENCE:

When you order your Trident Fiberglass Pool you can also order all of the major components you will need to complement a quality pool installation. Trident will have your entire order shipped directly to your job site, allowing you the convenience of a single source for all of your pool needs.

SAVINGS:

By ordering thru Trident, you receive wholesale pricing on all of your swimming pool equipment. This is made possible by your automatic enrollment in our nationwide buying group. With hundreds of members nationwide, we get the lowest prices from the best suppliers.

QUALITY:

All of the products selected by Trident have passed our strict quality guidelines representing what we have learned in over 50 years in the pool industry. Our Shell Pak is equipped with Sta-Rite's Maxi-Glass pumps teamed with their new System 3 modular filters. Lighting is supplied by Fiberstars, the leader in Fiber-Optic technology. From pool heaters to chemical feeders, each and every piece of equipment is selected for its high quality, durability and warranty support.

Trident, the complete swimming pool program for today's successful builders.

Trident Fiberglass Pools

Bringing the seashore to your back door

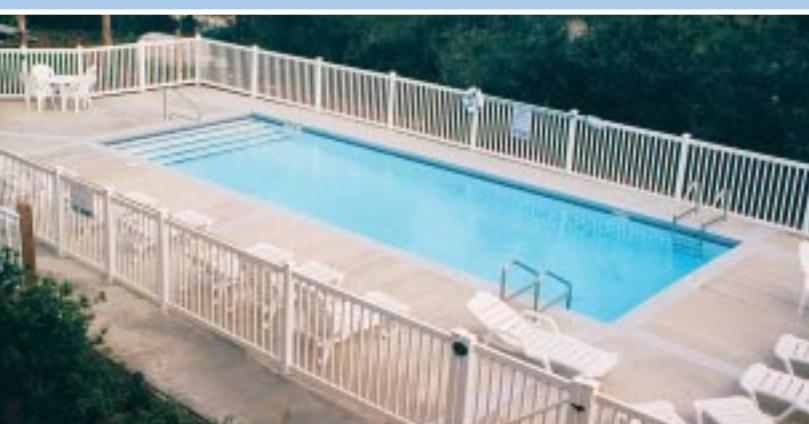

1 The pool is delivered to your job site directly from the factory.

2 Place the Trident Fiberglass Pool into the excavation, run the plumbing and backfill the pool.

3 Pour the deck and your pool is ready.

Installing a Trident Fiberglass Pool is as simple as 1-2-3

Making higher profits:

Smart builders today recognize the importance of making a profit on every aspect of building a home, yet many are giving away thousands of dollars in potential profit by not supplying one of their Customer's most sought after high ticket items, a swimming pool with their new home.

Now, with the Trident Fiberglass Pool program, you can profitably provide the highest quality pools in the market place, and it's as easy as 1-2-3.

Everything you need:

We provide virtually everything you need. The Pools can be delivered right to your job site, with a pre-plumbed pump and filter system and all the additional equipment your customer may desire.

Trident pools are easily installed with just a two or three man crew, usually in less than a week.

We offer complete training, easy to follow instructions, along with technical assistance throughout the installation. If desired, we can even supply sub-contracted installation crews.

Whatever your needs, Trident offers all of the products and expertise to expand your services and increase your profits.

Controlling your job site:

With the Trident program you never lose control over your job site. Builders who use either an independent pool builder or a sub-contractor can lose control over how their job proceeds and on what time schedule. Delays here can cost you thousands of dollars in interest payments along with dissatisfied customers.

With the Trident program you control the entire procedure, which takes only a few weeks, instead of the several months it can take to build a concrete pool. Maintaining control over your entire job, not only saves you money, it makes you money.

A legitimate warranty for your piece of mind.

Each Trident pool comes with a factory-backed warranty. This warranty is from us to your customer. You are not involved with having to back an independent pool builder's work. Imagine having a pool failure with a builder you kicked off your job site three years ago. With Trident, if you need us, we will be there.

The highest quality control possible.

When you purchase a Trident Fiberglass Pool, you have selected the highest quality pool on the market. Trident pools are manufactured with 100% Pure Vinyl Ester Resin throughout the entire laminate — not just the skin coat like other fiberglass manufactures.

Trident Fiberglass Pools are built to last!
