Worksheet 3

3.1 **Write a program that first reads an integer value which represents a number of days and then computes and prints the same number of days expressed as months, weeks and days. (Assume each month has 30 days.)**

Sample running:

Please input a number of days (1 – 999) : **130**<CR>

130 days is   4 month(s),   1 week(s) and   3 day(s).
