

Elevator Company

[www.schumacherelevator.com](http://www.schumacherelevator.com)

Our new 50,000 sq. ft. office and manufacturing facility was completed in April, 2000. Take a look...

Multiple loading bays make shipping and receiving efficient and convenient.

Drive-through doors allow for unloading trucks inside our facility.

Schumacher stocks several types of steel, iron, aluminum and stainless steel in various forms for our manufacturing needs.

Workstations are arranged to facilitate the efficient movement of jobs in progress.

We maintain thousands of parts in inventory to satisfy manufacturing and service needs.

Our Powder Coating facility allows us to put the most durable, high-quality, and attractive finish on our painted products.

During Powder Coating, charged pigment and resin powder particles are sprayed onto the surface and then heated and fused into a smooth coating.

Schumacher offers unlimited color capabilities.

(Right) Custom Wood Cab with Stone Tile Inlay  
(Below) LU/LA Front & Side Open Cab

Each cab Schumacher builds is pre-assembled in our shop to insure a perfect fit upon installation.

Tell us what  
you envision  
for your  
elevator.

We specialize  
in custom cabs

An excellent example of the custom work we do can be seen in the front entrance of our office.

Unique Lifts for Any Application

Tell us what you need, we'll show you how it can be done.
