Who We Are

Welcome to the Massachusetts Tree Wardens' & Foresters' Association. The MTWFA was formed in 1913 to provide a forum for professional tree managers to share their concerns for a common cause ... the shade trees growing in our communities.

Today, the Association serves as an organization committed to the protection of our urban and community forests. Membership is welcome to tree wardens and foresters as well as advocates of tree preservation at many levels.

Our Purpose

The association provides an informed and unified vision for the preservation, protection and enhancement of our urban forests. Included in this vision is the advocacy of properly trained professional municipal tree wardens and foresters, the allocation of adequate fiscal resources necessary to properly manage the urban forests and the development of partnerships at all levels to ensure a healthy environment.

What We Do

The Massachusetts Tree Wardens' & Foresters' Association (781-894-4759) ...

- provides Professional Development Series (PDS) that deal with issues in municipal and urban tree care

Sample topics include the following:

- PDS Tree Inventory methodology
- PDS Legal Issues
- PDS Equipment Safety & Maintenance
- Electrical Hazards Awareness Program Two-day workshop
- Annual Conference at Sturbridge, MA, featuring professional speakers and a variety of industry related exhibitors
- publishes the "Bark", a quarterly industry informative newsletter
- acts as a technical resource for the municipal tree care profession
- awards annual scholarships to students in arboriculture and urban forestry programs at the college level
- organizes the Annual Arbor Day Seedling Program providing organizations and communities the opportunity to purchase a variety of seedlings at low cost. Net proceeds are deposited towards the annual scholarship fund
