- C. continue
- D. compete

63) Technology continues to **influence** every aspect of everyday life.

- A. guide
- B. affect
- C. persuade
- D. manipulate

64) Technology continues to influence every **aspect** of everyday life.

- A. phase
- B. property
- C. viewpoint
- D. expression

PART TWO: SHORT-CONTEXT ITEMS

"Bokanovsky's Process is one of the major instruments of social stability!"

65) Who says this?

- A. DHC
- B. Fanny
- C. Mr Foster
- D. Henry Wimbush

"You all remember, I suppose, that beautiful and inspired saying of Our Ford's: History is bunk. History," he repeated slowly, "is bunk."

66) Who says this?

- A. Lenina
- B. Mr Foster
- C. The Controller
- D. Henry Wimbush

... worked in the Bottling Room, and her surname was Crowne. But as the two thousand million inhabitants of the plant had only ten thousand names between them, the coincidence was not particularly surprising.

67) Whose last name is Crowne?

- A. DHC
- B. Fanny
- C. Lenina
- D. Priscilla

Next to Mary a small gaunt man was sitting, rigid and erect in his chair. In appearance ... was like one of those extinct bird-lizards of the Tertiary.

68) Who is the man?

- A. Mr. Stone
- B. Mr. Scogan
- C. Henry Wimbush
- D. Mr. Barbecue-Smith

"That's my secret," he said. "I give it you freely." "I'll help you to find your Inspiration, because I don't like to see a nice, steady young man like you exhausting his vitality and wasting the best years of his life in a grinding intellectual labour that could be completely obviated by Inspiration. I did it myself, so I know what it's like.

69) Who says this?

- A. Mr. Stone
- B. Mr. Scogan
- C. Henry Wimbush
- D. Mr. Barbecue-Smith

"Catch him!" cried ..., jumping up. "We'll have a feather." The frightened peacock ran up and down the parapet in an absurd distress, curtsying and bobbing and clucking; his long tail swung ponderously back and forth as he turned and turned again. Then with a flap and swish he launched himself upon the air and sailed magnificently earthward, with a recovered dignity. But he had left a trophy. ... had his feather, a long-lashed eye of purple and green, of blue and gold. He handed it to his companion.

70) Who said this?

- A. Priscilla
- B. Fanny
- C. Mary
- D. Ivor

PART THREE: CROME YELLOW

- | | | |
|-------------------|------------------|-----------------------|
| A. Mr. Scogan's | F. R. Gombauld | K. Jenny |
| B. projected | G. obverse | L. Party of Souls |
| C. embedded | H. upstairs | M. surprised |
| D. Sir Ferdinando | I. communication | N. descriptive titles |
| E. expected | J. Henry Wimbush | O. Priscilla |

He helped Anne ...(71)..., left her in the hands of a maid, and came down again to the drawing-room. He was ...(72)... to find them all sitting just where he had left them. He had ...(73)... that, somehow, everything would be quite different--it seemed such a prodigious time since he went away. All silent and all damned, he reflected, as he looked at them. ...(74)... pipe still wheezed; that was the only sound. ...(75)... was still deep in his account books; he had just made the discovery that ...(76)... was in the habit of eating oysters the whole summer through, regardless of the absence of the justifying ...(77)..., in horn-rimmed spectacles, was reading. ...(78)... was mysteriously scribbling in her red notebook. And, seated in her favourite arm-chair at the corner of the hearth, ...(79)... was looking through a pile of drawings. One by one she held them out at arm's length and, throwing back her mountainous orange head, looked long and attentively through half-closed eyelids. She wore a pale sea-green dress; on the slope of her mauve-powdered décolletage diamonds twinkled. An immensely long cigarette-holder ...(80)... at an angle from her face. Diamonds were ...(81)... in her high-piled coiffure; they glittered every time she moved. It was a batch of Ivor's drawings--sketches of Spirit Life, made in the course of tranced tours through the other world. On the back of each sheet ...(82)... were written: "Portrait of an Angel, 15th March '20;" "Astral Beings at Play, 3rd December '19;" "A ...(83)... on their Way to a Higher Sphere, 21st May '21." Before examining the drawing on the ...(84)... of each sheet, she turned it over to read the title. Try as she could--and she tried hard--Priscilla had never seen a vision or succeeded in establishing any ...(85)... with the Spirit World. She had to be content with the reported experiences of others.

PART THREE: BRAVE NEW WORLD

- | | | |
|----------------------|------------------|------------------|
| A. happier | F. food | K. tried |
| B. ask for | G. contrary | L. extra leisure |
| C. Inventions Office | H. century | M. Mustapha Mond |
| D. muscles | I. agriculture | N. soma ration |
| E. consumption | J. shorter hours | O. Ireland |

"Awful? They don't find it so. On the **...(86)...**, they like it. It's light, it's childishly simple. No strain on the mind or the **...(87)...** Seven and a half hours of mild, unexhausting labour, and then the **...(88)...** and games and unrestricted copulation and the feelies. What more can they **...(89)...**? True," he added, "they might ask for shorter hours. And of course we could give them **...(90)...** Technically, it would be perfectly simple to reduce all lower-caste working hours to three or four a day. But would they be any the **...(91)...** for that? No, they wouldn't. The experiment was **...(92)...**, more than a **...(93)...** and a half ago. The whole of **...(94)...** was put on to the four-hour day. What was the result? Unrest and a large increase in the **...(95)...** of soma; that was all. Those three and a half hours of **...(96)...** were so far from being a source of happiness, that people felt constrained to take a holiday from them. The **...(97)...** is stuffed with plans for labour-saving processes. Thousands of them." **...(98)...** made a lavish gesture. "And why don't we put them into execution? For the sake of the labourers; it would be sheer cruelty to afflict them with excessive leisure. It's the same with **...(99)...** We could synthesize every morsel of food, if we wanted to. But we don't. We prefer to keep a third of the population on the land. For their own sakes—because it takes longer to get **...(100)...** out of the land than out of a factory. Besides, we have our stability to think of. We don't want to change. Every change is a menace to stability. That's another reason why we're so chary of applying new inventions. Every discovery in pure science is potentially subversive; even science must sometimes be treated as a possible enemy. Yes, even science."

GOOD LUCK!
