The previous list of *ninety-eight* dies was posted on *14th September 2012*, so in over four years of study only *three* more dies have been added to the list.

I suspect there aren't many more to be found!

'Six Reigns' list correct to *31st December 2016*.

And finally, the same list of 'Six Reigns' dies is arranged here in *longest lived order*.

The longest lived is "SC" (S1210.04M) in use by Salford Corporation from around 1886 through to at least 1995, some **109** years. The earliest known date for the die is the 17th October 1886, and the latest is the 3rd October 1995. The die was multiheaded with six patterns, in which the letters became somewhat irregularly shaped after die refurbishment in the early 1960's.
