

1311 Introduction to Architecture

Outline presentation

Tectonics and technics

Tectonics

-proportional relationship, arrangement

using clips as an example

habitation - space between clips

urbanization- the two blocks before clips are placed

technics- the composition, orders of parts

description- equally spaced/symmetry...etc

examples, height of pillar, arrangement of Japanese mat

Technics

-anchorage to ground

- mechanic

- reason e.g. joint removable

-environment material

-natural form and artificial form e.g. chopping board
