

# The Devil Lives in the Human Brain

Ronald S. Remmel

February 10, 2021

Some religions teach that Devils cause bad events.

But science has proven that Quantum Mechanics and General Relativity explain everything in the Universe.

Yet I believe that Devils do live in some human brains.

The Bible teaches that Satan is the father of all lies (John 8:44). When you meet congenital liars or habitual criminals, you can be certain that Devils live in their brains.

Devils pursue three main objectives: Money, Sex and Power.

**MONEY:** While ordinary people are content with \$1K or \$1M, for the rich \$1B or even \$1T might not be enough.

Ordinary people are happy in a 3-bedroom rambler and a Toyota eating burgers, but the rich need a penthouse, a Mercedes limousine and Kobe steak.

Politics is **THE GAME** of the rich and powerful to dominate and deceive the poor and miserable.

**SEX:** A faithful, satisfying wife and mother make an ordinary man happy, but the licentious seek a trophy beauty queen and adultrous adventures.

Rape, sexual assault, prostitution, dirty jokes, and pornography are all part of the fun.

The natural evolutionary urge to procreate is perverted by the Devil in the brain.

**POWER:** Domination of others and even of the whole world is the worst goal of the Devil in the brain.

Hitler tried to conquer the world, and Goebbels ran his slick propaganda machine of deceptions.

A recently defeated POTUS has made more than 20K lies or misleading statements (Washington Post).

Remember Stalin, Mao tse-tung, Napoleon, Genghis Khan, Caesar, and Alexander the Great?

Torturers delight in agony, slave masters whip slaves into submission, and capitalists foreclose on mortgagees and renters during pandemics.

Compassion and empathy are not in the vocabulary of the powerful.

Some Devils love still weirder obsessions.

Beware of Devils in the brains of people!
