

North Grove Trail

The park's North Grove Trail offers a 1.5-mile loop among the giant sequoia for which Calaveras Big Trees State Park is named.

The trail offers a gentle, readily accessible journey over boardwalks and smooth earthen pathways. A stroll along this trail, which begins near the park's "Big Stump," can be completed in about an hour while allowing one to read the numerous trail markers that identify points of interest, converse with other visitors and enjoy moments of awe-inspired reverie.
